

## Deadline

- All contracts based on midterm exam scores should be submitted by email to the TA by **midnight, Nov. 23**. If you choose to buy an official product, your email must specify the product number (A, B, C, etc.). If you form a contract with your classmate, the email must carefully states the names of both parties as well as the terms of the contract. Both parties must send such an email to the TA.
  - Economics Class: send your email to Yuanyuan Cheng ([yuanyuan\\_cheng@qq.com](mailto:yuanyuan_cheng@qq.com))
  - Finance Class: send your email to Na Li ([1020950694@qq.com](mailto:1020950694@qq.com))
- In the case of an option contract, the expiration time is at **midnight, Nov. 24**. This means the buyer must inform the TA if he/she decides to exercise the option before this time. If the buyer fails to inform the TA before expiration, it will be assumed that he/she does not intend to exercise the option. For example, if you have purchased official product B, then you must inform the TA before this expiration time if you would like to use the right to buy A.

## Rules

- All contracts must use J-points as currency.
- For official grade contracts:
  - Each person can only buy one of A, B, C, D.
  - Each person can only buy one of E, F.
  - Each person can only buy one of G, H.
- There is no limit to the number of private grade contracts you can enter into.
- You **cannot** use grade contracts or homework allowance trading to achieve personal financial gain or to serve purposes other than affecting your personal J-score. For example, A cannot write a contract with B that effectively allows B to transfer J-points to A in exchange for monetary return or personal favors<sup>1</sup>. **Warning: suspicious contracts will be investigated. If it is found out that contracts are written to achieve outside gain or to serve unrelated purposes, both parties will be punished. I reserve the right to determine the appropriate measure of punishment in this case.**

---

<sup>1</sup> For example, A cannot buy J-points from B using real money privately and write a contract that says B will give  $x$  J-points to A if the class average is above 0.
